

MediaMaster™ Video On Demand System

220" Direct-View LED Integrated Wall Display

MM-1722-220

Specifications

- Width:** 16.1 ft (4.89 m)
- Height:** 9.4 ft (2.86 m)
- Depth:** 0.1 ft (3.1 cm)
- Weight:** 728 lbs (330 kg)
- Power:** 6.2 kW max,
2.48 kW typical,
0.5 W standby

Description

Our direct-view LED wall panels are made for large-venue indoor display applications such as board rooms, lobbies, performing arts halls, lecture halls, multi-purpose rooms, commons spaces, cafeterias, and fitness centers.

Available in a number of sizes and pixel pitches in the MM-1722-x series, the sheer size and image quality of these displays will impress your audiences, and the ease of use will impress your staff.

This series is a fully-integrated solution, with the video processor, scaler, and power supply built into the display, eliminating the need for rack-mounted components taking up space in the room with A/V cabinets or in adjacent equipment rooms.

Contrast this with our MM-1729 discrete-component direct-view LED video wall products. The primary distinction is that this line presents as a full-capability display to the MediaMaster System, allowing power, input, volume, and audio mute control, whereas the discrete-piece alternative requires custom software for fine control, with the trade-off of being more flexible. That makes this series more appropriate for typical indoor applications, whereas the discrete option is better for outdoor applications and cases where something custom is wanted.

Our MM-1722 series displays are most often used in conjunction with our MM-127x and MM-177x series IPTV decoders for digital signage and broadcast applications.

Features

- 1920 × 1080 resolution
- 2.5 mm pixel pitch
- 3 × HDMI 2.0 inputs
- 1 × HDMI 2.0 output
- USB-C input
- 2 × 30 W sound bar
- Line-level out to external sound systems
- RS-232 control port
- Ethernet control port
- 2.4 GHz & 5 GHz WiFi
- Network screen sharing for up to 4 picture-in-picture or split-screen applications

Available Accessories

- IPTV Decoder (MM-127x and MM-177x series)
- Spare LED modules and sender/receiver cards
