

MediaMaster™ Video On Demand System

65" Interactive 4K LED-Lit Display

MM-1721-65

Specifications

- Width:** 60 in (152 cm)
- Height:** 38 in (96.5 cm)
- Depth:** 4.7 in (12 cm)
- Weight:** 97 lbs (44 kg)
- Power:** 120 W typical, 0.5 W standby

Description

Our interactive flat panel lets users write or draw on the screen with their fingers or styluses. It's most often used in the classroom with our MediaController (MM-1150) product for video on demand based interactive lessons.

The display offers RS-232 serial control, allowing the MediaMaster Server (MM-8200+) to automatically control the display. The typical method for doing this is to pass serial control through the school's Ethernet network via an MM-127x or MM-177x series set-top-box.

This is the most common configuration that we certify which sends both IPTV and display control over your school's data network:

Features

- 65" diagonal ultra bright liquid crystal display
- 3840 × 2160 resolution
- Stereo speakers
- 3 HDMI inputs
- VESA mount
- VGA (RGB) input
- RS-232 control port

Available Accessories
