

# MediaMaster™ Video On Demand System

PrestoVideo Service Host

MM-8100PV

## Specifications

**Height:** 1U or 2U

**Width:** fits 19 in rack

**Depth:** 16 in behind ears

**Weight:** 15-20 lbs

**Power:** 120 VAC at 60 Hz

## Description

This server hosts the file conversion service behind the PrestoVideo front-end software. (MM-1142)

Our MM-8100PV is a server-grade rack-mount PC running a custom MediaMaster server application atop the latest business-grade version of Microsoft Windows. This server converts PowerPoint presentations uploaded through the MM-1142 front end to a video format compatible with ETR's digital video distribution system.

This server typically sits in the server or video source rack, though it could be installed anywhere on the site's LAN.

A UPS battery backup is highly recommended. It can share backup power facilities with the main MediaMaster server (MM-1000, 2000, 3000 or 4000) if the specified UPS is large enough.

## Features

- Server grade hardware designed for continuous uptime
- 64-AMD64 multi-core processor
- Gigabit Ethernet
- 8 GB of RAM
- 500 GB OS drive
- Windows 11 Pro
- PowerPoint

## Related Products
